# The best neighborhoods in Toronto

Mithun Chakraborty

August 1, 2019

## 1.Introduction

### 1.1Background(Business Problem)

Toronto is the ultimate multicultural destination, as underlined by its many ethnic enclaves, all peppered with a variety of delicious restaurants, bars etc.

Although each neighborhood offers a deep dive into its dominant culture's retail and culinary offerings, they all somehow also cater to a variety of urban tribes, from the creative to the foodie type. Together, they tell the tale of a city both resolutely heritage-minded and full-throttle dedicated to its burgeoning future. Real-estate is booming industry now in Toronto, people are immigrating from different countries and making Toronto as their new home. Hence it will be advantages for them to know which place is best for them to stay in Toronto neighborhoods. This project aims to figure out where to stay when in Town.

## 2. Data

Data that might contribute to determining best places in the neighborhoods might include food, Education, Entertainment, Commutation, Crime, Rent, Housing prices. I will be using Foursquare location data to solve the problem. I will provide rank to each neighborhood based on above mentioned data and then share the result of top ten neighborhoods in Toronto.
